URBAN FOREST

COLLECTION

**VOXFLOR**®
passion and purpose

Urban Forest Collection is inspired by convergence-divergence: roots tend to be dense and solid (past), but branches and leaves diverge and extend to the sky (future). They crisscross, interpreting familiar textures in different ways.

The exterior skin of the building is designed with woven lines, creating light, shadow, entity and white space, which is then presented as sculpture. It has a distinct smell of land (past), while reminiscent of advanced technical images (future).

This collection makes people know more about the products and the design ideas they represent. Link different spaces and places with fresh visual language to stimulate people's desire to explore.
